Subject Index

ABH incompatible bone marrow, transplantation of: gravity sedimentation of donor marrow (Ho, Champlin, Feig & Gale), 155.

Adsol® preservation solution, use for prolonged storage of low viscosity AS-1 red blood cells (Heaton, Miripol, Aster, Hartmann, Dehart, Rzad, Grapka, Davisson & Buchholz), 467.

Alloimunization in an A_2 recipient, development of 'auto anti-A, antibodies' following (Mangal, Sinclair, Contreras, Armitage & Hazlehurst), 714

Anaemia, aplastic, reduced helper (OKT4+): suppressor (OKT8+) T ratios in: relation to immunosuppressive therapy (Kuriyama, Tomonaga, Jinnai, Matsuo, Yoshida, Amenomori, Yamada & Ichimaru), 329.

Anaemia, autoimmune haemolytic, and aplastic crisis (Celada), 178.

Antithrombin III deficiency, familial, prophylactic antithrombotic therapy with stanozolol in patients with (Winter, Fenech, Bennett & Douglas), 527.

Atherosclerosis and von Willebrand factor. I. Prevalence of severe von Willebrand's disease in Western Europe and Israel (Mannucci, Bloom, Larrieu, Nilsson & West), 163.

Bone marrow transplantation: a review of delayed complications (Deeg, Storb & Thomas), 185.

Book reviews

Bleeding Disorders: Investigation and Management, 354.

Blood Cell Volume Analysis—A New Screening Technology for the Haematologist, 542.

Functional T Cell Subsets Defined by Monoclonal Antibodies, 180.

Massive Transfusion in Surgery and Trauma, 181.

Minimal Residual Disease in Acute Leukaemia, 353.

Primary and Secondary Immunodeficiency Disorders, 180.

The Cobalamins, 182.

Botrocetin, the agglutination of human platelets by: evidence that botrocetin and ristocetin act at different sites on the factor VIII molecules and platelet membrane (Howard, Perkin, Salem & Firkin), 25.

Cancer, disseminated bronchial, testosterone, erythropoietin and anaemia in patients with (Schreuder, Ting, Smith & Jacobs), 521.

Chloroquine stripping of HLA antigens from neutrophils without removal of neutrophil specific antigens (Minchinton & Waters), 703.

DDAVP, effect on plasma levels of factor VII and XII (Brommer, Kluft, Bertina & Alderkamp), 173.

Desamino-D-arginine vasopressin and naloxone infusions, effect on factor VIII and possible endothelial cell related activities (Moffat, Giddings & Bloom), 657.

Differentiation antigens on mouse eosinophils and neutrophils identified by monoclonal antibodies (Lopez, Strath & Sanderson), 489.

Divicine, activity of, in *Plasmodium vinckei*-infected mice has implications for treatment of favism and epidemiology of G-6-PD deficiency (Clark, Cowden, Hunt, Maxwell & Mackie), 479.

Eosinophilia, *in vitro* differentiation of myeloid progenitor cells in patients with (Kern & Dietrich), 81.

Erythrocyte osmotic fragility in man: variation with age and sex (Hussain & Voaden), 716.

Esterases, α-naphthyl acetate, in human leucocytes and platelets, two-dimensional separation of (Oertel & Kastner), 431.

Factor VIII:C, fractionation of human antibody to: an IRMA for phospholipid binding sites on factor VIII C:Ag (Kemball-Cook & Barrowcliffe), 633.

Factor X, kinetic studies of the activation of, by factors IXa and VIII:C in the absence of thrombin (Neal & Esnouf), 123.

Ferritin, cell surface, expression by peripheral blood lymphocytes and monocytes (Cragg, Hoy & Jacobs), 679.

Fragment E-related neoantigen, radioimmunoassay of: validation studies and clinical application (Chem, Hanna, Williams & Krauss), 133.

Gene arrangement, triplicated γ-globin, haematological phenotype of (Thein, Hill & Weatherall), 349.

Glutathione content, normal, and some related enzyme activities in the fetal erythrocytes (Lestas & Rodeck), 695.

Haemoglobin E, heterozygotes and homozygotes for, ultrastructure and cell cycle distribution of erythropoietic cells in (Wickramasinghe, Hughes, Wasi, Fucharoen & Litwinczuk), 685.

Haemoglobinopathies, antenatal diagnosis of, by improved method of isoelectric focusing of haemoglobins (Ferrari, Crema, Cantu-Rajnoldi, Pietri, Travi, Brambati & Ottolenghi), 265.

Haemophilia carriers, detection of: multivariate analysis compared with discriminant analysis using up to five factor VIII variates (Duncan, Tunbridge, Duncan & Lloyd), 113.

Haemopoiesis, lodgement of haemopoietic cells in the course of, on cellulose ester membrane: an experimental model for haemopoietic cell trapping (Tavassoli), 71.

Haemopoiesis, long-term, in human fetal liver cell cultures (Cappellini, Potter & Wood), 61.

Heparin inhibition of the anticoagulant activity of, by platelets, brain phospholipids, and tissue factor (Ofosu, Cerskus, Hirsh, Smith, Modi & Blajchman), 229.

ICSH reference method for staining of blood and bone marrow films by azure B and eosin Y (Romanowsky stain) (INTERNATIONAL COMMITTEE FOR STANDARDIZATION IN HAEMATOLOGY), 707.
ITP, chronic, platelet autoantigens in (WOODS & MCMILLAN), 1.

K cell mediated haemolysis: influence of large numbers of unsensitized cells on the antibody-dependent lysis of anti-D-sensitized erythrocytes by human lymphocytes (BAKÁCS, KIMBER, RINGWALD & MOORE), 447.

L-Asparaginase therapy, influence on the fibrinolytic system (VELLENGA, KLUFT, MULDER, WIJNGAARDS & NIEWEG), 247.
Leu-10 (HLA-DC/DS) antigen distribution in human leukaemic disorders as detected by a monoclonal antibody: correlation with HLA-DR expression (AL-KATIB & KOZINER), 373.
Leucocyte alkaline phosphatase in disease states, altered isozyme patterns of (MILLER, YANG & LIEPMAN), 145.
Leucocyte phagocytic stimulatory material released by activated human platelets, characterization of (SAKAMOTO & FIRKIN), 49.
Leukaemia, acute lymphoblastic, failed central nervous system prophylaxis in children with: treatment and outcome (PINKERTON & CHESSELLS), 553.
Leukaemia, acute lymphoblastic, separation of diploid from aneuploid cells in (WALLE & NIEDERMEYER), 571.
Leukaemia, acute myeloblastic, and t(8;21) translocation (JACOBSEN, TEMPLE & SACHER), 539.
Leukaemia, acute myeloid, without evidence of differentiation induction, partial remission of low dose cytosine arabinoside (LEYDEN, MANOHARAN, BOYD, CHENG & SULLIVAN), 301.
Leukaemia, acute myelomonocytic, combined esterases in (TAVASSOLI), 178.
Leukaemia, acute non-lymphocytic, in relapse, the use of intermediate dose cytosine arabinoside (ID Ara-C) in the treatment of (VAN PROOIJEN, DEKKER & PUNT), 291.
Leukaemia, acute, positive Coombs test in (SOLAL-CELIGNY, VAZEUX, VROCLANS, AMAR, HERRERA, BERNARD & BOIVIN), 563.
Leukaemia, acute promyelocytic, probable *in vivo* induction of differentiation by retinoic acid of promyelocytes in (NILSSON), 365.
Leukaemia, chronic granulocytic, with spontaneous karyotype conversion, twenty-five year survival of (SINGER, MCDONALD & DOUGLAS), 309.
Leukaemia, chronic lymphocytic, defective expression of T cell antigens in: relationship of T cell dysfunction (KAY & KAPLAN), 105.
Leukaemia, chronic lymphocytic, normal T cell colony numbers in untreated patients with (FERNANDEZ, MACSWEEN & LANGLEY), 97.
Leukaemia, hairy cell, uncommon complications of (KEIDAN, LIU YIN & GORDON-SMITH), 176.
Leukaemia, prolymphocytic: surface morphology in 21 cases as seen by scanning electron microscopy and comparison with B-type CLL and CLL in 'prolymphocytoid' transformation (POLLIACK, LEIZEROWITZ, BERREBI, GAMLIEL, GALILI, GUREFL & CATOVSKY), 577.
Leukaemia, Sudan black B positive acute lymphoblastic (STASS, PUI, MELVIN, ROVIGATTI, WILLIAMS, MOTRONI, KALWINSKY & DAHL), 413.
Lymphomas, malignant, with band 8q24 chromosome abnormality: a morphologic continuum extending from Burkitt's to immunoblastic lymphoma (SIGAUX, BERGER, BERNHEIM, VALENSI, DANIEL & FLANDRIN), 393.
Lymphomas, non-Hodgkin T-cell (cutaneous and lymphoblastic lymphomas excluded), clinical and immunological study of (BROUET, RABIAN, GISSELBRECHT & FLANDRIN), 315.

Medulloblastoma cells, human, a monoclonal antibody binding to, and to the platelet glycoprotein IIB–IIIa complex (JONES, FRITSCHY, GARSON, NOKES, KEMSHEAD & HARDISTY), 621.
Melanoma cell plasminogen activator, differential inhibition of two molecular forms of, by a placental inhibitor (LECANDER, ROBLIN & ÅSTEDT), 407.
Mixed cell colonies, human: unicellular or multicellular origin—analysis by G-6-PD (POWELL, FIALKOW & ADAMSON), 89.
Myelodysplastic syndromes, bone marrow histology in. I. Histological findings in myelodysplastic syndromes and comparison with bone marrow smears (TRICOT, DE WOLF-PEETERS, HENDRICKX & VERWILGHEN), 423.
Myeloid progenitor cells in the circulation of patients with myelofibrosis and other myeloproliferative disorders (HIBBIN, NJOKU, MATUTES, LEWIS & GOLDMAN), 495.
Myeloma, is it really a monoclonal disease? (DURIE), 357.
Myeloma, multiple, bone marrow plasma cell infiltration in (DE GRAMONT *et al*), 351.

Nuclepore membranes, 3 μm, evaluation of the contribution of red and white cells to the flow of suspensions of washed blood cells through (JONES, HOLLAND, HUMPHRYS, QUEW & WARDROP), 457.

Platelet and vascular arachidonic acid metabolites: can they help detect a tendency towards thrombosis? (PATRONO, PRESTON & VERMYLEN), 185.
Platelet crossmatch tests using radiolabelled staphylococcal protein A or peroxidase anti-peroxidase in alloimmunized patients (YAM, PETZ, SCOTT & SANTOS), 337.
Platelet destruction, abnormal, the interpretation of platelet kinetic studies for the identification of sites of (PETERS, SAVERYMUTTU, WONKE, LEWIS & LAVENDER), 637.
Platelet factor 4, effect on assays of plasma heparin (LEVINE, SORENSON, HARRIS & KNIERIEM), 585.
Platelet factor-4 excretion in myloproliferative disease: implications for the aetiology of myelofibrosis (BUR-

STEIN, MALPASS, YEE, KADIN, BRIGDEN, ADAMSON & HARKER), 383.
Platelet heterogeneity (TROWBRIDGE), 540.
Platelet release defect induced by aspirin or penicillin G does not increase gastrointestinal blood loss in thrombocytopenic rabbits (GILES, GREENWOOD & TINLIN), 17.
Platelet survival during antilymphocyte globulin treatment, factors influencing (GRATAMA, BRAND, JANSEN, ZWAAN, VALENTIJN & EERNISSE), 5.
Polyvinylpyrrolidone (CASILLAS), 175.
Prostacyclin, platelet inhibitory activity of, in the presence of erythrocytes as studied with the impedance aggregometer (GRESELE, DECKMYN, ARNOUT & VERMYLEN), 171.
Protein C antigen, decrease in, and formation of an abnormal protein soon after starting oral anticoagulant therapy (VIGANÒ, MANNUCCI, SOLINAS, BOTTASSO & MARIANI), 213.
Prothrombin-converting activity, enhanced, and factor Xa binding of platelets activated by the alternative complement pathway (ÖNZE-ANWAR, FREEDMAN, SENYI, CERSKUS & BLAJCHMAN), 221.

Sickle haemoglobin and the $\alpha\alpha\alpha$ globin gene haplotype, interaction of (HIGGS, CLEGG, WEATHERALL, SERJEANT & SERJEANT), 671.
Spherocytosis, congenital, impaired formation in splenectomized subjects with: 'pitted' erythrocytes (O'GRADY, HARDING, EGAN, MURPHY, O'GORMAN & MCCARTHY), 441.

Thalassaemia, $(^{A}\gamma\delta\beta)^{\circ}$, Indian, previously identified as $^{G}\gamma$-HPFH, restriction endonuclease gene mapping studies of (NAKATSUJI, GILMAN, SUKUMARAN & HUISMAN), 663.
Thalassaemia, $(^{A}\gamma\delta\beta)^{\circ}$: similarity of phenotype in four different molecular defects, including one newly described (TRENT, JONES, CLEGG, WEATHERALL, DAVIDSON & WOOD), 279.
Thalassaemia, B, feasibility of antenatal diagnosis of, by DNA polymorphism in Asian Indian and Cypriot populations (OLD, PETROU, MODELL & WEATHERALL), 255.
Thalassaemia, Indian deletion β°, population and genetic studies suggest a single origin for (THEIN, OLD, WAINSCOAT, PETROU, MODELL & WEATHERALL), 271.
Thalassaemia, red cell enzyme activities in (ANDERSON, PERRY, CLEMENTS, VIVES CORRONS, PUJADES, AGUILAR, JOU, ROZMAN & ESTER), 711.
Thromboembolism in pregnancy and its management (LETSKY & DE SWIET), 543.
Thromboplastin in endothelial cells, production and availability of: the effects of thrombin, endotoxin and platelets (BROX, ØSTERDU, BJØRKLID & FENTON), 239.
T lymphocyte subpopulations that regulate elaboration of glanulocyte-macrophage colony stimulating factor, identification of (VERMA, JOHNSTON & MCCREDIE), 505.

Vincristine, low-dose, effects on megakaryocyte colony-forming cells and megakaryocyte ploidy (HARRIS & PENINGTON), 37.
von Willebrand factor and atherosclerosis (MANNUCCI, BLOOM, LARRIEU, NILSSON & WEST), 163.
von Willebrand factor, human, hybridoma antibodies to. I. Characterization of seven clones (MEYER, ZIMMERMAN, OBERT & EDGINGTON), 597.
von Willebrand factor, human, hybridoma antibodies to. II. Relative role of intramolecular loci in mediation of platelet adhesion to the subendothelium (MEYER, BAUMGARTNER & EDGINGTON), 609.
